REPRODUCIBLE TESTING

COMPACT
DESIGN

One company

Awesome possibilities

OUR ROOTS

In January 2010 Convergence Industry was founded as a spin-off company from Twente University in The Netherlands. Ever since, Convergence Industry has become a reliable global player when it comes to designing and manufacturing customized fluid handling systems. Once started as a specialist on lab-scale membrane characterization systems, Convergence Industry soon incorporated the experience and knowledge on automation and functional design into other fields of research. Where accurate control of liquids and gases is required, Convergence Industry offers awesome and endless possibilities!

OUR MISSION

Our mission is to deliver Accurate, Automated and Awesome systems all over the world, because we believe that functional

design and automation can be improved everywhere. Convergence Industry will give its best to become a Triple A company, employer and supplier. Accurate for using the best components and parts, Automated for using the highest level of automation and user-friendly user interfaces and Awesome because of excellent support, product training and powerful exterior design of each system. In this way the team of Convergence Industry contributes in making your research more reproducible and your data easier to handle and extract.

OUR TEAM

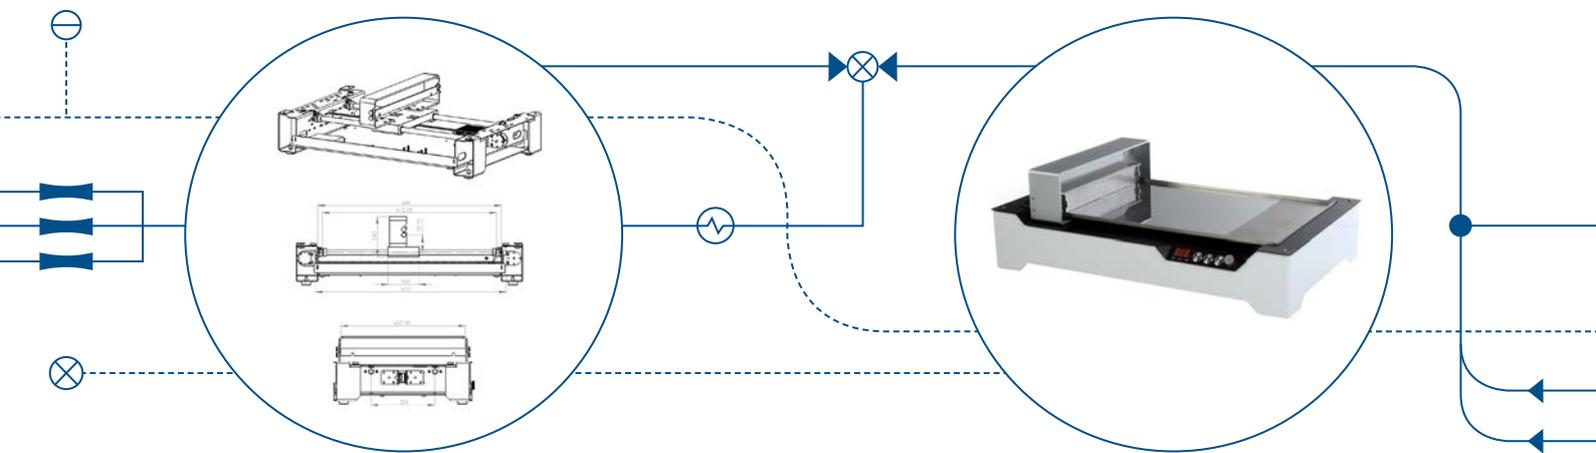

The entire Convergence Industry team is continuously committed to engineer, manufacture and deliver systems up to the requirements of its customers. The talent, knowledge, skills and commitment of the team is key to the success of this company.

Your idea, your specifications, our final touch!

Convergence Industry is an experienced specialist when it comes to engineering, designing and manufacturing gas and liquid handling systems. Convergence Industry built a significant portfolio with its microfluidic and membrane systems,

but is also well known for its product development projects. Whether in search for a redesign of a product or in need for a partner to develop an idea into a functional system, Convergence Industry is the answer!

Product development

To keep ahead of competitors in a rapidly changing market, new product ideas need to be developed and launched into the market as quickly as possible. Convergence is your partner of choice in realizing the shortest time to market by translating your idea into a functional model and a production-ready system. In this process, Convergence Industry examines all technical and financial aspects to improve the final product: from the exterior design up to the development of a user-friendly software interface.

Our Triple A approach results in a product that stands out from other products in the market.

From prototype to final product

In the process of translating a good idea fast into a functional and new system, Convergence Industry will start from scratch by designing and building a prototype to prove the concept. After proving the concept, it will go fast! Within a few months the first series of beta products is ready to market.

CHOOSE WISE, CHOOSE CONVERGENCE

Product development requires a close and sustainable collaboration, where the different disciplines of engineering, design and automation work together. **Make sure to choose a reliable partner: Convergence Industry.**

What do our customers think?

ROBIN DE BRUIJN BUSINESS DEVELOPER

'More than 5 years ago, I met Felix Broens of Convergence and a solid partnership was established immediately. Chielant de Wit and Felix form an invaluable team I continue to enjoy working with. We gained a lot of expertise on microfluidic systems, where specifications are tight and delivery conditions demanding. The whole crew at Convergence is not impressed by this at all, striving to deliver value no matter what. My background and activities in microfluidics, chip design, microfabrication technologies and biological/pharmaceutical applications remain a passion. I hope to share it with these friends from Twente for years to come!

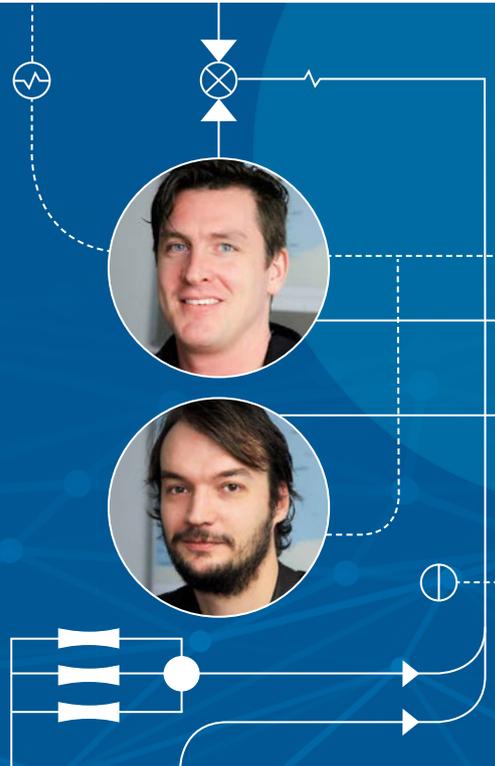

convergence

Accurate · Automated · Awesome

A PERSONAL NOTE FROM THE FOUNDERS

FELIX BROENS & CHIELANT DE WIT

'First of all, thank you for your interest in Convergence Industry and its products. We really appreciate you taking the time to learn more about our company. In the past years Convergence Industry developed from a flexible start-up to an ambitious grow-up. The devoted and ambitious team, the loyalty of partners and clients made this possible. The next years will be about supplying triple A systems all over the world. We want our **'Accurate, Automated and Awesome'** philosophy to be reflected on both our products and collaborations: we will keep on going until you're satisfied! We are very much looking forward to start close and long-lasting collaborations where trust is key. Increasing our knowledge and having happy clients who enjoy working with our products is of great value to us. That will motivate us to do our utmost and get to an awesome result together. We hope to welcome you soon to work on your next project!'
